

Alvin H. Clemens

I am a recent graduate of the University of Utah's coding bootcamp for Full Stack Web Development, with a Bachelor's Degree from Saint Michael's College in Political Science. These last few months have been exciting, working in react and furthering my understanding of the connections of the front end to the back end services. I am eager to keep learning and have proved to myself that no problem is too hard to solve.

PROJECTS

Sure-Vote

GitHub: <https://github.com/jburz/sure-vote>

LiveSite: <https://young-journey-30565.herokuapp.com/>

This app was built as my final project and was built to be a secure voting site. My job was to build our facial recognition lock to secure the site.

Technologies: React.js, JavaScript, Express.js, Passport.js, Nodemailer, Azure API, MongoDB

Remember Them

GitHub: <https://github.com/Cloggedbat/remember-them>

LiveSite: <https://protected-forest-25007.herokuapp.com/>

Remember Them is a web-based application that is a tribute page to fallen U.S. service members. The user can research fallen heroes, add a hero to the database, link to other military-related websites, and discuss the fallen in the forum. They can also contact administrators to provide feedback.

Technologies: Dotenv, Express-Handlebars, Nodemailer, Nodemon, Sequelize, ES Lint

EXPERIENCE

Ski Butlers, Park City Utah — Team Lead

November 2019 - March 2020

Stowe Cider, Stowe Vermont — Head Sales Representative
